

ART DECO BOM

BLOCK 1: ARROWS

/ The Art Deco movement began in France right before World War I. The artistic influence was far reaching, and can be seen often in the buildings and decor of New York City, including the Chrysler Building, statues such as Prometheus and Atlas in Rockefeller Center, and tiling in NYC subway stations. Blending modern design with material use, this design movement has inspired artists for decades, and the remains can still be seen today in architecture, wall tiles, and art. I was inspired to create this Art Deco block of the month when I visited NYC at the end of 2017. Each 16" block can be incorporated into a 12 block sampler for a throw size quilt, or they can be used as foundation blocks with rotation, repeat and creative layout to make quilts with aesthetic impact. /
